

Introducing Eleo: a powerful online software that makes fundraising and donor management easier and more effective!

e get the picture: Nonprofits need committed donors and supporters in order to accomplish important work, but fundraising and donor cultivation can eat up an organization's staff time and budget. Current and potential donors may believe in a nonprofit's cause, but these days they're deluged with communications that can make them feel anonymous, interchangeable, and unappreciated.

That's where Eleo comes in. Our mission is simple: to be the easiest and most affordable online tool for nonprofits to use to build donor relationships and increase donations.

Using current software technology and geared specifically toward the needs of nonprofits, Eleo's reliable, easily accessible web-based software brings together a powerful suite of donor and fundraising management tools in a format that is intuitive, easy to use, secure, and customizable, at a cost far below that of other donor management systems. Eleo's features facilitate the management of your donor information, enabling you to cultivate stronger, more sustainable donor relationships; build long-term stewardship; and increase the return on your fundraising efforts.
